HELPFUL HINTS: FANTASY ZONE II

- Level One Log Creature - Follow paths through the logs and keep shooting towards the log creature. The laser works well here.
- Level Two Totem Pole Creature - This sectional creature needs to be shot below the head first. The three way shot works well against the bottom portion of the pole. Eight bombs or the twin shot works.
- Level Three Block Creature - Aim at any part of this creature. It is best to concentrate your shots towards the center. Twin shot is a good weapon here.
- Level Four Dragon Creature - You must concentrate your fire power towards the Dragon's head. Shoot his head continuously. Try the 7-way shot against him. Keep using the 7-way towards his head.
- Level Five Chubby Cheeks Creature - When this creature is at its largest size, that's when you attack him with full force! Two possible weapons are the heavy bomb and the 7-way shot.
- Level Six Multiple Eye Creature - There are six sections to this creature. The attack is similar to Level Two. You must shoot below the top section first. It will shrink down to one section. Once again, 7-way shot works best. Choose a weapon that will get the most shots in.
- Level Seven Cylinder Creature - This creature rotates. Use the 7-way shot at him only when his head is at an angle. He likes showing his profile.
- Level Eight The House of the Blackhearts - You will meet the creatures listed above once again. But, then there is a surprise! You will be faced with a creature such as yourself. Give it your best shot! Try to attack him when he is underneath you. Push him towards the bottom portion of the screen, this is where he will lose power and you have a better chance of attack.
- The Clock A Clock will appear from time to time. It adds 20 seconds to the time you have your weapon.
- To Continue Be sure to purchase this for \$20,000.00. Once you are killed, you must press the start button between the "Game Over" screen and the "Title Screen". This is the only way you will be able to use the Continue you have purchased.
